Script Reminders

Script Renewals

Medication Reminders

Script Owing

Unlike *other* software providers, MemoCare does not encrypt your data to prevent you changing provider. **This means you will *always* control & retain your patients' details.**

MedsCheck Reporting & Claiming Made Easy

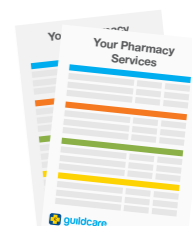

- Identifies** Prompts for patients who may be eligible for MedsCheck or Diabetes MedsCheck
- Records** Pre-populates patient details & medication history from dispense
- Reports** Generates reports for GP & patient incorporating Patient Medication Profile (PMP)

Notes

Patient Centric Model of Care

Patient Plan focuses on primary care areas such as: **Diabetes, Respiratory, Cardiovascular & Mental Health**. It shows how programs can link to assist patients with their disease state management.

- Pharmacists can choose GuildCare programs, as well as add their own pharmacy services, to incorporate into a patient's personalised plan
- Patient is provided with information & guidance to use your pharmacy's services for optimal health benefits

Upon completion, pharmacists are paid professional service fees for sponsored programs. iPad application available. Please enquire for terms and conditions. May qualify as a Clinical Intervention.
